Article type
Research Article (Standard Sections).

Abstract length
199 words.

Statement of originality and prior dissemination
This manuscript is original, is not under consideration elsewhere, and has not been published previously in whole or in part. The annual census it reports, the fitted models and every analysis script are openly archived under CC BY 4.0; the DOI is given in the Data Availability statement. The Newcastle Urban Observatory observations the census is computed over are a third party's openly licensed collection (CC BY 4.0) and are cited as such. No part of this work has appeared in a conference proceedings or a book chapter.

Use of generative AI
Declared in full in the manuscript's Generative AI Use Disclosure Statement, in accordance with PeerJ's Generative AI policy: the tool, its version, how it was used, and the authors' confirmation of originality, of the tool's terms of use, and of responsibility for the whole content.

Data and code availability
Raw third-party observations and all derived data, models and analysis scripts are openly available

under CC BY 4.0 at the DOI stated in the manuscript's Data Availability statement. Nothing required to reproduce the results is withheld.

Opposed reviewers
None.
